

The Let's Talk Mining™ Workshop explains in everyday language how modern mining is carried out. The mining sequence, from discovery to mine closure and reclamation, is covered with an emphasis on the benefits and challenges associated with mine development and operation. Participants are encouraged to ask questions to learn about this unique industry that is so important to modern society. The Workshop includes numerous photographs, examples of mining activities, explanation of jobs and consulting opportunities and a discussion of current sector trends.

This workshop is for people from communities, government and industry who can benefit from a better understanding of the mining industry.

Let us:

- Improve your understanding of the steps to finding, opening and closing a mine
- Answer your questions about coal and metal mines and quarries
- Outline the potential benefits and challenges of mining
- Increase your community's understanding of mining
- Help you appreciate the economic opportunities
- Outline government regulations and sector best practices.

Let's Talk Mining™ Workshop

This is a dynamic workshop built for those who want to understand the life cycle of the mineral exploration and mining business. The instructors are independent and highly experienced with respect to industry activities. The workshop addresses the most commonly voiced concerns regarding industry activities. Examples of mining successes and challenges are profiled to illustrate how companies, governments and communities can benefit from the sector.

ENGAGING EXPERT INSTRUCTORS

Phillip "Jerry" Asp

Jerry is one of western Canada's most prominent Aboriginal leaders. He has been involved with mining for most of his life, both working within the industry and as a Tahltan Chief. He is committed to enhancing the quality of life for Aboriginal people through the creation of new business opportunities and development of skills and capacity in the community. In 2010, Jerry was awarded the Skookum Jim award by the Prospectors and Developers Association of Canada.

Dave Lefebure, Ph.D., P.Geo.

Dave has worked on mineral exploration and mining for both government and industry over his thirty five year career. He has examined numerous exploration and mine sites across Canada. A former Chief Geologist of British Columbia, Dave frequently delivers presentations and workshops on exploration, mining and related government regulations to a wide variety of audiences. He enjoys sharing his mining souvenirs to help you understand this unique industry.
